With good reason, many people have been misled by the fact that the word "cancer" is used to describe a wide variety of diseases. The word "cancer" is a general term that covers a wide range of diseases, from the most common, breast and lung cancer, to the most rare, such as leukemia and lymphoma. The word "cancer" is also used to describe a wide range of diseases, from the most common, breast and lung cancer, to the most rare, such as leukemia and lymphoma.
